Valerie Gongora

Software Developer

City of Johannesburg, Gauteng, South Africa

Summary

I am a calculating individual, making use of logic to solve my problems. I am an addict of the great arts and literature. I consider technology as something that should be a tool for human improvement rather than a distraction from human problems.
I believe in creating, improving and perfecting with the use of technology.

I am a systems thinker that believes good teamwork can be systematized and there is no substitute for individual effort.

And a reward of a good book will always get me there quicker.

Experience

Autoboys South Africa
Software Developer
August 2023 - Present (10 months)

Telesure Investment Holdings (TIH)
Software Developer
June 2022 - July 2023 (1 year 2 months)
South Africa

Telkom
Full Stack Web Developer (Intern)

Centurion, Gauteng, South Africa

BCX
Software Developer Intern
February 2019 - May 2019 (4 months)
Sunninghill, South Africa

For the four months as an intern I was part of an enjoyable Oracle Database Administration team that taught me all there was to all their work so as to help their work less time consuming and more enjoyable to work on.

Roles and Responsibilities:

-Managing Oracle Database using PL/SQL
-Automating reports from the database making them readable
